SUMMARY

Senior software engineer, full-stack capable but deepest in backend and platform work, and engineering manager. Eight years across payments, e-commerce, health, and logistics. Open to contract, fractional, and full-time engagements, remote and flexible across time zones.

SELECTED OUTCOMES

- Tokopedia:** took over an intern-built subscription MVP and revamped it end to end; daily payment success rose 3–4× (from under 10% to 30–40%), test coverage to 85%.
- AnekaPay:** led a Node.js + MongoDB → Go + MySQL migration, consolidating 14 services into 6 and roughly halving estimated infrastructure cost; owned architecture, business continuity, and disaster recovery.
- Delos Aqua:** grew engineering from 3 to 25; metrics-driven performance reviews with zero complaints across two years; led ISO 27001 gap remediation company-wide.
- Shipper:** built and led a 12-engineer team across three countries; rolled a Honeywell-integrated WMS out to its first 3–5 warehouses at 99.99% uptime, inside a ~300-warehouse network moving 40–60k orders/day.
- Halodoc:** shipped FitScore (adopted by tens of thousands of users) and a multi-doctor chat platform (5,000+ users) as EM of 10, at 100% SLA compliance.

CORE STACK

Go · Java · Node.js · TypeScript · Kubernetes · Docker · Kafka · gRPC · GraphQL · AWS · GCP · PostgreSQL · MySQL · MongoDB · Redis · Grafana · Prometheus · Loki · Tempo · Mimir

EXPERIENCE

Independent · Freelance & Advisory	Feb 2026 – Present
Career break · family & personal	Oct 2025 – Feb 2026
Engineering Manager · Halodoc	Mar 2025 – Oct 2025
Technical Advisor · AnekaPay	Jul 2024 – Feb 2025
Engineering Manager · Delos Aqua	Jan 2022 – Jul 2024
Software Engineer Lead · Shipper	Nov 2020 – Jan 2022
Senior Software Engineer · Tokopedia	Oct 2018 – Nov 2020
Software Engineer · Astragraphia IT	Oct 2017 – Oct 2018

EDUCATION

B.Eng · Universitas Gadjah Mada	2011 – 2016
